GROUP 4

ASIPHE SIXIMBA

1st Proposal

TRAVEL EASE is the name of the business

1. Organisation overview

Travel EASE is a small travel agency business that creates tailor-made hassle-free travel experience. It allows friends, couples, families, colleagues and solo travellers to book and plan their trip. The business aims to create convenience by making booking services, travelling tips and travel experiences offered all in one.

Target audience

Friends

Couples

Families

Work trips

Solo travellers (with safety focus)

2. Website Goals and Objectives

Goal: The website will allow users to book and plan their whole trip on an interactive site.

Objectives:

Easy access to flight booking discounts. (5–10% OFF)

Allow customers to book hotels, activities and make restaurant reservations.

Have useful safety alerts and travel tips.

Ability to change date and time of bookings.

3. Current website analysis

Travel Ease currently have social media platforms where they post and interact with customers about traveling and destination ideas. Customers are also able to visit their office for bookings and enquiries.

A lot of people may not have access to these services as it may be considered not very convenient. By having a website, users will be able to book and plan trips at their own convenience. This will increase efficiency.

4. Proposed Website Features and Functionality

- **Home Page**

Introduces Travel EASE and gives a quick overview of services.

Includes a welcome message, key features, and featured destinations like **Cape Town** and **Dubai**.

- **About Page**

Explains what Travel EASE is and its purpose.

Focuses on the mission to make travel planning simple, affordable, and safe.

- **Services Page**

Outlines what the website offers.

Includes destination guides, booking services, activity planning, and safety features.

- **Destinations Page**

Showcases travel locations such as **Cape Town** and **Dubai**.

Includes basic information, attractions, and travel tips.

- **Bookings Page**

Allows users to plan and book trips.

Includes flights, hotels, restaurants, and activity bookings.

- **Contact Page**

Provides ways for users to get in touch.

Includes a contact form, email, support details and store address.

- **Safety Page**

Focuses on traveller safety.

Includes alerts, safe area recommendations, and safety tips.

5.Design and User Experience (UX)

The website will have a modern, vibrant, and engaging design with high-quality images to inspire travel.

Navigation will be simple and well-structured, allowing users to easily move between destinations, bookings, and travel categories. The design will prioritise ease of use and clarity.

6. Technical requirements

HTML.

7. Timeline

Research: 5 days

Design: 4 days

Development: 7 days

Testing: 5 days

3 weeks

8. Budget

2nd proposal

BECOMING HER 👑

1. Organisation details

Becoming HER 👑 is a small business started by Asiphe. Our mission is to inspire women to grow into their confidence by way of fashion, self-expression, and self-development. We aim to target women who are transitioning through phases of their lives. Whether it be entering a new phase of womanhood, switching up your lifestyle or if you are consciously deciding to become a better you.

At Becoming HER, we encourage women to style themselves however they want to and be comfortable in their skin. We believe that beauty is subjective and should be defined by you. We embrace all sizes and shapes to promote body inclusivity and positivity. We want to shift the focus from what is considered the “ideal woman,” to helping women feel confident, comfortable, and most importantly aligned with who they are.

2. Website Purpose and Goals

The purpose of the website is to provide a comfortable, convenient, and empowering website where women can shop and easily express themselves. With our online store customers will be able to browse and purchase products without leaving their homes.

Furthermore, we want the website to be simplified so those who are not technologically inclined can easily navigate through it. Overall, we want the website to be a space where women can find confidence, inspiration, and direction.

Goals of the website include:

- Allowing users to comfortably purchase products online at any time, from anywhere.
- Ensuring that people of all digital backgrounds can easily understand how to use and access the website.
- Offering women of all walks of life and body types of style and fashion advice.
- Creating a safe space for women to express themselves and feel confident.
- Inspiring women to better themselves, know their worth and live life with purpose.
- Making it easy for our customers to browse our products and get contact with us.

3. Analysis of Existing Websites

We currently sell to our customers and provide style inspiration through social media. We also offer client visits for styling consultations or purchases.

However, both methods are not as accessible as they could be. By having a website, customers will be able to browse products, book styling appointments, and access our services from the comfort of their home at any time. They will also be able to make purchases through the website.

4. Features and Functionality

- Home page

Our shop will be introduced with our name Becoming HER 👑 following with a minimal but bold logo. We will display featured clothing, a brief description about our brand and easy access to our other pages such as: Shop, Services and Contact.

- About us page

On this page we will talk more about our story as a brand. Our mission and values will be explained. (Our values include confidence, inclusivity, bettering yourself).

- Shop page (Collections)

We will display our collections of clothing. This will include lounge wear, confidence wear, casual wear etc.

- Services (Style & Guide) Page

We will combine our styling services and advice on this page. We will provide body positive style advice for everybody and information about our styling sessions along with an easy option to book your appointment.

Gallery/Lookbook

This page will display outfits for inspiration purposes, so users can easily visualise styles they may want to try.

Contact & Enquiry Page

Contact information will be linked with an enquiry form so that users can easily inquire questions/get in contact. The physical store address will also be displayed.

5. Design and UX

Neutral and warm colours, empowering and elegant design aesthetic.

Body positivity – will display a variety of models that consist of all sorts of body shapes and sizes. Navigation will be effortless and flow freely with visually where you can find products, styling tips, etc.

Language used on website will be uplifting and empowering, non-judgemental.

6. Technical

HTML – Website structure

7. Timeline

Research: three ½ days

Design: 4 days

Development: 7 days

Testing: 5 days

Total – 3 weeks.

8. Budget

Domain Name Website registration: R150

Web Hosting Basic Website Plan: R1 200

Development Provided: R700

Content & Images: R300

Data charges for testing website: R500

Maintenance Basic website maintenance: R300

Total: R3 150
